

Consistent Software

What's new in WiselImage for AutoCAD version X

Interface

- Completely redesigned *Scanning module* with direct support for Contex, Graphtec and Colortrac SmartLF scanners.
- *Symbol Recognition Template Library* – a single source for symbol templates that can be used for symbol tracing, raster to vector conversion, hybrid selection and Search & Replace.

Vectorization

- *Automatic Raster-to-Vector conversion* for color and grayscale images.

Vector editing

- *Vector Automatic Correction* with a rich set of options.
- *Polylines Automatic Correction* with a rich set of options for merging, and combining polylines.

Raster Editing

- *Adaptive Blur* filter for blurring non-uniform color areas inside color transition boundaries in grayscale and color images.
- *Line Breaks Filling* tool for eliminating raster line breaks in bitonal images.
- *Search and Replace* with support of *Symbol Recognition Template Libraries*.
